## COTTON FURNISHES ONLY EXCITEMENT

Secretary of Treasury Reported to Be Considering Issuing Five-Year Liberty Loan.

MARINE STOCKS ARE STRONG

Steel Issues Firm-Money on Call Free-American International Ac tive-General Motors Leads Its Group Upward.

BY BROADAN WALL.

BY BROADAN WALL.

NEW YORK, August 19.—Stocks were quiet but strong to-day, cotton furnishing all the excitement in Wall Street. Money was called freely by the banks and brokers were inclined to turn away business for that reason. The crop situation remains good and the war news was so good that it was a wonder more was not done by way of celebration. The apparent reason for inactivity was the war tax program, which is so near to official settlement that men of influence in the market think they might as well wait a little longer and know for certain what they can do. In the meantime they are gathering in the tax exempt 3 1-2 per cent Liberty bonds, sending them today to the new high record of 191.06. In high banking circles to-day it was said that the secretary of the treasury was considering a proposition to make the new loan a five-year one with liberal tax exemptions. If that is done it will go like the proverbial hot cakes and remain above par in the market.

Marine was strong to-day, the rumor

Market.

Marine was strong to-day, the rumor being current that the sale of British interests was "on again." American International was also active and rose a point, thus lending color to the rumors. Rumely moved upward as more and more people are learning of its great profits from participation in the shiphylidis. the shipbuilding program of the country.

Motors were all strong under lead-ership of General Motors which ad-vanced to within half point of its high

vanced to within half point of its high record.

Cotton behaved so strangely that Wall Street killed the crop, and then revived it all in one day. Speculative options advanced from fifty-seven to seventy-three points, broke from 129 to 169 points, and then railled from eixty-eight to seventy-four points. Gross movements amounted to more than \$15 a bale, and prices closed about where they began. It is all due to the uncertain weather continued with the knowledge that if the war is to end in 1919 there will be a scramble for cotton, for the world is bare of it.

Steel issues were firm and what little buying was done was for account of important interests. The industry is assured a full volume of business for many years after the war and at high prices for this country alone will be in financial position to do the world's business during the period of reconstruction.

Hundreds of Men Now Employed Un-

One million unskilled laborers are wunted immediately for absolutely essential war work, and the situation so far as it affects skilled labor is almost as serious. The government does not intend to risk any shortage of supplies for its new army, and unless those engaged in the less essential industries agree voluntarily to curtail their labor requirements, the general government will be forced to take the most drastic measures to secure labor for its inevitable nece sities.

The set of four books resembled to all outward appearance the other volumes of this nature in their various piecon-holes, but within the covers lay the revelation.
